2024 is going to be an exciting year for us! Our market creating innovation is set to roll this year which is the Green Basket, an initiative linking smallholder farmers to consumers in the urban cities via an online platform on which consumers can shop for their fresh fruits and vegetables from the comfort of their desk and mobile devices and have them delivered to them in their neighbourhood. With is, we hope to improve the lives of over 200 farmers and meet the food need of at least 2000 consumers within the 1st year. Additionally, in this 2024, our Adopt A Garden Initiative will work with 4 orphanages to ensure food security. We intend to we use this platform to ensure these children gain valuable life skills like self-confidence, responsibility, creativity, health and fitness and nutrition.

Green Farmlands is a community-based organisation aimed at achieving sustainable communities in Cameroon by leveraging agriculture and its related activities to achieve food security and improve livelihoods. Our goal is to promote food security, improve livelihood and make communities more sustainable through improved agricultural activities. Created in 2016, we have engaged in a number of projects like training smallholder farmers on new and improved farm techniques, providing knowledge and resources to orphanages and ensuring food security for the children housed in these orphanages.

# SOME SUCCESS STORIES

## FIVE (5) SUCCESS STORIES

By Atim Mbah
